### **III. Realizare remarcabilă**

(Descrieți într-o manieră cât mai accesibilă (în maximum 1 pagină) cea mai importantă realizare științifică/tehnică/artistică din ultimii 5 ani și impactul acesteia.)

Interesul meu se concentrează asupra starilor de valență neobisnuite pe care metalele le pot atinge în medii de relevanță biologică, pe care le abordez în manieră multidisciplinară – de la biologie moleculară la biochimie, chimie de sinteză anorganică și organică, chimie analitică, biofizică, cinetică și modelare moleculară. Corpul de lucrări științifice publicate în ultimii ani de mine în acest domeniu are următoarele 3 merite:

1. aduce noutăți și propune paradigme pentru înțelegerea mecanismelor stresului oxidativ și nitrozativ în organismele vii; menționez aici structura și reactivitatea centrilor metalici de valență înaltă sau a celor suprareduși, dar și noi idei de tehnologii de producere și modalități de analiză a substitutelor de sânge („sânge artificial”)
2. se găsesc în reviste de impact, astfel încât pentru perioada 2005-2009 **suma factorilor de impact** ai articolelor publicate, raportată la numărul de autori, este după știința mea **cea mai mare din țara în domeniile chimie și biologie**, și a fost de fapt în acest fel în ultimii 4 ani, în condițiile în care comparăm datele mele (la vârsta prezentă de 35 de ani și fără calitatea de conducător de doctorat) inclusiv cu cele ale principalelor personalități în domeniu din România – profesori, conducători de școli doctorale.
3. prin componenta de substitut de sânge a atras atenția presei naționale. În particular, după știința mea sunt singurul caz de cercetător UBB pentru care rețelele naționale de televiziune și-au trimis reprezentatii în laboratoarele universității și au transmis reportajele **în buletinele de știri prime-time pe toate canalele majore din România**, fără ca aceste apariții să fie solicitate sau popularizate prin comunicate de presă ale noastre.

Consider că suma rezultatelor de până acum acoperă atât criteriul de calitate științifică (număr mare de lucrări ISI, cu factori de impact mari, și implicit vizibilitate internațională), cât și cel al contactului direct cu societatea (componenta substitut de sânge), cât și cel financiar (atrageră de fonduri semnificative către universitate), criterii care justifică o candidatură la titulatura de „personalitate de excelență a UBB”.
