RECTORATUL

Universitatea Babeș-Bolyai Competiția Excelenței 2010

Dosar individual

Notă: Toate datele se referă la perioada 2005-2009

Nume, prenume, grad did.	HORIA F. POP, PROFESOR UNIVERSITAR
Facultatea, Catedra	FACULTATEA DE MATEMATICĂ ȘI INFORMATICĂ CATEDRA DE LIMBAJE ȘI METODE DE PROGRAMARE
Domeniul științific	INFORMATICĂ
Adresa paginii web personale	http://hfpop.ro
Adresa e-mail	hfpop@cs.ubbcluj.ro

Criteriaul I – Output

1. Articole științifice publicate în reviste indexate ISI (cu menționare factorului de impact în cazul celor cotate)

- [1] Sârbu, C., and Pop, H. F. Principal Component Analysis versus Fuzzy Principal Component Analysis. A case study: The quality of Danube water (1985-1996). *Talanta* 65 (2005), 1215-1220. *IF*=3.206
- [2] Sarbu, C., Pop, H. F., Elekes, R. S., and Covaci, G. Intelligent disease identification based on discriminant analysis. *Revista de Chimie* 59, 11 (2008), 1237-1241. *IF*=0.389
- [3] Pop, H. F., Einax, J. W., and Sârbu, C. Classical and fuzzy principal component analysis of some environmental samples concerning the pollution with heavy metals. *Chemometrics and Intelligent Laboratory Systems* 97, 1 (2009), 25-32. *IF*=1.940
- [4] Pop, H. F. A tutorial on object-orientedness in functional programming. In *Second Central European Functional Programming Summer School (CEFP 2007), Revised Selected Lectures. Lecture Notes in Computer Science, LNCS 5161/2008 (Babes-Bolyai University, Cluj-Napoca, Romania, June 23-30 2007)*, pp. 228-249. ISBN 978-3-540-88058-5.
- [5] Serban, C., Vescan, A., and Pop, H. F. A new component selection algorithm based on metrics and fuzzy clustering analysis. In *Proceedings of the 4th International Conference on Hybrid Artificial Intelligence Systems. Lecture Notes in Artificial Intelligence, LNCS 5572/2009 (Salamanca, Spain, June 10-12 2009)*, pp. 621-628. ISBN: 978-3-642-02318-7.

2. Articole științifice publicate în ISI proceedings

- [1] Frentiu, M., and Pop, H. F. Tracking mistakes in software measurement using fuzzy data analysis. In *The 4-th International Conference RoEduNet Romania (Sovata, Târgu-Mures, Romania, May 20-22 2005)*, pp. 150-157. Organized by the Romanian Education Network RoEduNet and the "Petru Maior" University, Târgu-Mures. ISBN 973-7794-26-5.
- [2] Fei, X., Lu, S., Pop, H. F., and Liang, L. R. GFBA: A genetic fuzzy biclustering algorithm for discovering value-coherent biclusters. In *2007 International Symposium on Bioinformatics Research and Applications (ISBRA'2007). Lecture Notes in Bioinformatics, LNCS 4463/2007 (Georgia State University, Atlanta, May 6-9 2007)*, pp. 1-12. ISBN: 978-3-540-72030-0.

- [3] Pop, H. F., and Frentiu, M. Applications of principal components methods. In Complexity in Artificial and Natural Systems, Proceedings (2008), Editura Universitatii Petru Maior, Târgu-Mures, pp. 267-270. ISBN 978-973-7794-76-5.
- [4] Vescan, A., Grosan, C., and Pop, H. F. Evolutionary algorithms for the component selection problem. In The 2nd International Workshop Evolutionary Techniques in Data Processing (2008), vol. 1529-4188, IEEE Computer Society Press, pp. 509-513. ISBN 978-0-7695-3299-8.

3. Articole științifice indexate în BDI (din lista CNCISIS)

Articole în reviste

4. Distincții, premii și alte recunoașteri naționale și internaționale

--

5. Studenți naționali atrași (activități de coordonare științifică și didactică)

Îndrumare lucrari de licență (număr lucrări susținute)

25 lucrări de licență susținute în perioada 2005-2009

Îndrumare lucrări de disertație (număr lucrări susținute)

27 lucrări de dizertație susținute în perioada 2005-2009

Doctoranzi (lista nominală a doctoranzilor înmatriculați resp. lista nominală a tezelor susținute)

Diana Man, înmatriculată octombrie 2007
 Maria Toșa-Abrudan, înmatriculată octombrie 2007
 Radu Găceanu, înmatriculat octombrie 2008
 Jakab Hunor, înmatriculat octombrie 2008
 Lefkovits Szidonia, înmatriculată octombrie 2008
 Bocsi Botond, înmatriculat octombrie 2009

6. Studenți internaționali atrași (activități de coordonare științifică și didactică)

Doctoranzi (lista nominală a doctoranzilor înmatriculați resp. lista nominală a tezelor susținute)

Pali Gabor, drd. cotutela ELTE Budapesta, înmatriculat octombrie 2008

7. Membru in comitetul de redacție la reviste ISI

--

8. Membru in comitetul de redacție la reviste BDI

Executive editor, *Studia Universitatis Babeș-Bolyai, Seria Informatică*
 Member of the Editorial Board, Technical Editor and Reviewer of the "International Journal of Computer Science and Applications", published by Research Publications

9. Participări la programe/granturi de cercetare finanțate din sursă internațională (se menționează și valoarea)

--

10. Participări la programe/granturi finanțate din sursă națională (se menționează și valoarea)

2007–2010

CRONIS – Decision system based on multi-agent techniques for the generation, optimization and management of the national registry of chronic non-transmissible diseases. Partners: Institute for Research, Design and Production of Automatization Equipment and Installations Bucharest, Cluj Branch, Ion Chiricuta Oncological Institute of Cluj, Iuliu Hatieganu University of Medicine and Pharmacy of Cluj and Babes-Bolyai University of Cluj. Grant PNCDI II Partnerships No. 11-003/2007. *Valoarea contractului = 340.000 lei*

2006–2009

Contributions in the domain of multiagent systems using methods of cognitive psychology, interface agents and aspect oriented programming paradigm. Partners: Chair of Clinical Psychology and Psychotherapy, Chair of Psychology and Chair of Programming Languages and Methods from BBU. Grant 307248/2006, financed by the Babes-Bolyai University. *Valoarea contractului = 74.250 lei*

2005-2007

Systems for collaborative decision aid in academic environments - case study BBU. Grant TP 2/2005, financed by the Babes-Bolyai University. Research grant coordinated by Prof. Stefan Nitchi.

2004-2007

Evolutionary computing: new paradigms, techniques and classes of evolutionary algorithms. Grant 23/322/2004, 23/322/2005, Contract between the Babes-Bolyai University, Cluj-Napoca and the Ministry of Education and Research. Research grant coordinated by Prof. D. Dumitrescu.

11. Coordonări de programe/granturi finanțate din sursă internațională (se menționează și valoarea)

--

12. Coordonări de programe/granturi finanțate din sursă națională (se menționează și valoarea)

2007 - 2010

Project director of the PNII-IDEI research grant ID_550/2007, "Robust methods and models of data analysis with applications to natural sciences", financed by Romanian National Council for University Scientific Research (CNCSIS). *Valoarea contractului = 971.000 lei. Valoarea finanțată efectiv = 819.933 lei*

2005 - 2008

Project director for the Faculty of Mathematics and Computer Science, Babes-Bolyai University Cluj-Napoca for the excellence research grant no. PC-D11-PT00-147 "New techniques in nuclear magnetic resonance on solids"; General contractor is the Research and Development Institute for Isotopic and Nuclear Technologies, Cluj-Napoca, Romania. *Cota parte din valoarea contractului = 48.268 lei*

13. Profesor invitat la universitati de prestigiu, cu titlu oficial

Wayne State University, ianuarie – mai 2006

14. Membru în comisii profesionale relevante, cu titlu oficial

Expert evaluator CNCSIS
Expert evaluator ARACIS

15. Conferințe invitate internaționale

July 9, 2008

Research Conference on "Theoretical Aspects of Fuzzy Sets in Data Analysis" at the Research Seminar, Department of Computer Science, University of Edinburgh, United Kingdom

February 21, 2006

Research Conference "Fuzzy Sets in Data Analysis: Between Theory and Applications" at the Graduate Seminar, Department of Computer Science, Wayne State University

16. Membru în comitete de organizare sau științifice ale unor conferințe internaționale

July 2-4, 2009

Co-chair of the Organizing and Program Committees at the International Conference on Knowledge Engineering Principles and Techniques, KEPT'2009, organized by the Department of Computer Science, Babes-Bolyai University, Cluj-Napoca, Romania

August 28-30, 2008

Member in the Program Committee at 2008 IEEE International Conference on Intelligent Computer Communication and Processing, ICCP 2008, organized by the Department of Computer Science, Technical University of Cluj-Napoca, Romania

November 28-30, 2007

Member in the Program Committee of the International Conference on Advances in Computer Vision and Information Technology ACVIT-07, organized by the Department of Computer Science and Information Technology, Dr. Babasaheb Ambedkar Marathwada University Aurangabad (MS), India

September 6-8, 2007

Member in the Program Committee at IEEE 3rd International Conference on Intelligent Computer Communication and Processing, ICCP 2007, organized by the Department of Computer Science, Technical University of Cluj-Napoca, Romania

June 25-30, 2007

Member in the Organizing Committee at The Central European Functional Programming School, CEFP 2007, organized by the Department of Computer Science, Babes-Bolyai University, Cluj-Napoca, Romania

June 6-8, 2007

Member in the Organizing Committee and Program Committee at The First International Conference on Knowledge Engineering: Principles and Techniques KEPT 2007, organized by the Department of Computer Science, Babes-Bolyai University, Cluj-Napoca, Romania

September 1-2, 2006

Member in the Program Committee and chair of session A1 "Artificial Intelligence and Agents" at IEEE 2nd International Conference on Intelligent Computer Communication and Processing, ICCP 2006, organized by the Department of Computer Science, Technical University of Cluj-Napoca, Romania

July 25 - August 4, 2005

Member in the Organizing Committee of the EuroLAN 2005 Summer School on "The Multilingual Web: Resources, Technologies and Prospects", organised by The Romanian Academy, "Alexandru Ioan Cuza" University of Iasi and Babes-Bolyai University Cluj-Napoca

May 20-22, 2005

Chairman at The 4-th International Conference RoEduNet Romania, Sovata, Targu-Mures, Romania, organized by the Romanian Education Network RoEduNet and the "Petru Maior" University, Targu-Mures, Romania

III. Realizare remarcabilă

De cele mai multe ori, într-un experiment, sistemul de interes este studiat și controlat în așa fel încât răspunsul înregistrat la un moment dat se datorează practic modificării unui singur parametru (variabilă). În ultimul timp, s-a realizat că multe dintre sistemele din natură au o structură intrinsecă multidimensională, necesitând astfel experimente și metode de analiză și interpretare a datelor mai complexe, în scopul obținerii informației utile maxime. Referitor la studiul sistemelor chimice și, mai ales, a celor care privesc mediul înconjurător trebuie să subliniem, însă, că multe dintre variabile se modifică simultan în timp și/sau spațiu și, de aceea, un control sistematic al tuturor este practic imposibil. În aceste condiții, devine deosebit de importantă stabilirea metodelor și a modalităților de depistare a proceselor și cauzelor care definesc și controlează aceste sisteme.

Datorită perfecționării instrumentației și a metodelor analitice, a fost posibil să se obțină și să se analizeze mult mai multe date, privind sistemele chimice și de mediu, cu o precizie și o rezoluție temporală mult mai mare decât s-a putut face anterior. Astfel încât, acum, în scopul caracterizării sistemelor, indiferent de natura acestora, este posibil să se colecteze baze mari de date, conținând un număr mare de rezultate pentru un mare număr de cazuri sau probe. Numărul mare de probe și, implicit, de date este necesar datorită, în primul rând, variabilității și complexității sistemelor naturale în special și, în al doilea rând, datorita diferențelor inerente ale acestora comparativ cu sistemele obișnuite studiate în laborator.

Calea optimă, privind înțelegerea acestor interacțiuni multiple și complexe, constă în măsurarea a cât mai multor parametri caracteristici. Rezultatele acestor măsurări se constituie, astfel, în mari seturi de date. Prelucrarea și interpretarea rațională a unor asemenea seturi de date se poate face numai prin folosirea unor metode computaționale eficiente și robuste. Dintre acestea, cele mai eficiente și, în același timp, cele mai des folosite s-au dovedit a fi Analiza componentelor principale, analiza clusterilor și, mai ales, metodele de clasificare și analiză robustă, bazate pe mulțimi fuzzy (regresie fuzzy, analiza componentelor principale fuzzy, alte metode de analiză multivariată bazate pe mulțimi fuzzy), la care am adus o contribuție semnificativă.

Metodele robuste de analiză a datelor oferă o abordare alternativă la metodele clasice. Motivația constă, printre altele, în nevoia de a produce metode de analiză a datelor care nu sunt afectate de precizia redusă a datelor sau de faptul că există elemente în setul de date care nu se conformează comportării generale a datelor, ca de exemplu valorile izolate sau valorile lipsă.

În analiza statistică clasică, metodele se bazează în mod consistent pe astfel de presupuneri care nu sunt satisfăcute în practică. Din păcate, în situațiile când setul de date conține puncte izolate, sau prezintă mai multe subseturi cu particularități diferite, metodele clasice practic eșuează. Metodele robuste de analiză a datelor oferă posibilitatea de a generaliza abordările clasice de așa natură încât rezultatele să nu fie afectate precizia datelor, de valorile izolate sau lipsă și nici de alte particularități ale datelor.

Impactul abordării robuste bazată pe teoria mulțimilor fuzzy este evident dacă se urmăresc doar listele citărilor, precizate în acest document.
